

# Tool Tutorial (Scenario 1)

Freshman Zoë

Zoe’s teacher introduces Zoe to the portfolio system *Esporre* in her freshman homeroom class. The high school is using *Esporre* to document school work, and students are encouraged to used the system for their own projects as well. The teacher is showing them how to use the system in anticipation for their first project of the year, which they are starting soon.

Scenario Goal :

Understand tool uses and steps needed to add and organize material.

UX Lane		Zoe is welcomed and introduced to Esporre		Zoe is asked to enter some information about herself to begin the identity-building process		Zoe begins the tutorial and is prompted to practice the uploading and metadata process		Zoe learns what milestones are and is prompted to add them to her project.		The tool prompts Zoe to practice the layout process, showcasing the tool layout templates.
	Portfolio Process	Welcome screen and design process layout	Portfolio personalization and onboarding process	Learning to use the system	Adding files to the system. Capturing process and reflections.	Organizing files in system to aid personal use and allow for an easier process to product documentation transition.				
Tools & System	Tools & System	Upon clicking you arrive at the login screen	<i>Esporre</i> is accessed through laptops at school.	System contains an onboarding process and tutorial stage. Tutorial explains prompts throughout the process.	System prompts users to add files from their work today. System stores student uploads, prompting them to add captions for reflection and keywords for later organization.	<i>Esporre</i> has a personal panel for management of student materials, before sharing & publishing online.				
			System has an account for each student.			System allows for tagging of uploaded content.				
System Checks	System Checks		→ Login → Personal Onboarding	→ Upload Process → Captioning → Keywords and Metadata	→ Milestone explanation → Milestone annotation	→ Template showcase → Layout process				
		Human Interaction	The teacher introduces Esporre.		Students and teacher talk and discuss what work they would like to upload to Esporre	Teacher explains what milestones are within the context of their class work, providing examples.
